START your own remote patient monitoring business right now!

WWW.SHOW2DOC.NET

TARGET PATIENT GROUPS:

- patients with COVID-19
- patients with chronic diseases
- pregnant women
- elderly people and people who take care of them

REMOTE PATIENT MONITORING (RPM) SOLUTION AGAINST COVID-19

- Proper treatment on early stages can significantly reduce the number of heavy cases and hospitalizations
- Show2Doc allows virtual care with possibility of full scope outpatient treatment with no visits to the clinic: convenient task manager, simple videocalls, timely live chat, doctors prescriptions, medication management, patient diary, vitals monitoring, scheduling and much more

Daily monitoring with Show2Doc allows doctors to manage a treatment process and keep tracking patients activities
