- possibility of set up for hospital servers
- branded set ups for your customers

Patients and doctors have no effective instrument for timely detection of changes in symptoms of COVID-19 during self isolation and ambulatory treatment

Late recognition of worsening symptoms does not allow timely adjustment to treatment

an increase in the number of severe cases and the need for hospitalization

WHAT IS THE SOLUTION?

DAILY MONITORING WITH

Healthcare should focus on introducing daily monitoring of health status and follow-up of prescriptions in patients in self-isolation and outpatient treatment

Doctor-patient communication platform Show2Doc is specially designed for Covid-19 monitoring. The platform allows the doctor to set an individual measurement and medication schedule for each patient, contact via text and video chat with him for clarification and moral support

FULL SCOPE OUTPATIENT TREATMENT WITH NO VISITS TO THE CLINIC:

- convenient task management
- simple videocalls
- timely Live chat
- doctor prescriptions
- medication management
- patient diary
- vitals monitoring
- scheduling and much more
